TROPICAL CYCLONE BULLETIN NR. 1 Tropical Depression KABAYAN

Issued at 5:00 AM, 17 December 2023

Valid for broadcast until the next bulletin at 8:00 AM today.

THE LOW PRESSURE AREA EAST OF SURIGAO DEL SUR HAS DEVELOPED INTO TROPICAL DEPRESSION "KABAYAN".

Location of Center (4:00 AM)

The center of Tropical Depression KABAYAN was estimated based on all available data at 525 km East of Davao City (7.5°N, 130.4°E)

Intensity

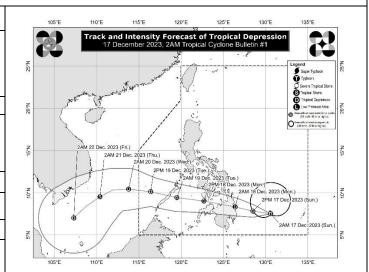

Maximum sustained winds of 55 km/h near the center, gustiness of up to 70 km/h, and central pressure of 1002 hPa

Present Movement

Westward at 10 km/h

Extent of Tropical Cyclone Winds

Strong winds extend outwards up to 350 km from the center

TRACK AND INTENSITY FORECAST

	Center Position			Intensity		Movement
Date and Time	Lat. (°N)	Lon. (°E)	Location	MSW Cat.		dir. and speed (km/h)
12-Hour Forecast 2:00 PM 17 December 2023	7.8	128.5	245 km East Southeast of Hinatuan, Surigao del Sur	55	TD	W 20
24-Hour Forecast 2:00 AM 18 December 2023	8.3	126.4	In the vicinity of Hinatuan, Surigao del Sur	55	TD	WNW 20
36-Hour Forecast 2:00 PM 18 December 2023	9.0	122.7	Over the coastal waters of Siaton, Negros Oriental	45	TD	W 35
48-Hour Forecast 2:00 AM 19 December 2023	9.4	119.5	90 km East Southeast of Puerto Princesa City, Palawan	45	TD	W 30
60-Hour Forecast 2:00 PM 19 December 2023	10.1	116.4	255 km East Southeast of Pag-asa Island, Kalayaan, Palawan	45	TD	WNW 30
72-Hour Forecast 2:00 AM 20 December 2023	10.4	113.8	90 km Southwest of Pag-asa Island, Kalayaan, Palawan (OUTSIDE PAR)	55	TD	W 25
96-Hour Forecast 2:00 AM 21 December 2023	9.5	110.4	460 km West Southwest of Pag-asa Island, Kalayaan, Palawan (OUTSIDE PAR)	65	TS	WSW 15
120-Hour Forecast 2:00 AM 22 December 2023	7.0	107.3	1,300 km West Southwest of Southwestern Luzon (OUTSIDE PAR)	55	TD	SW 20

TROPICAL CYCLONE BULLETIN NR. 1 Tropical Depression KABAYAN

Issued at 5:00 AM, 17 December 2023 Valid for broadcast until the next bulletin at 8:00 AM today.

TROPICAL CYCLONE WIND SIGNALS (TCWS) IN EFFECT						
TCWS No.	Luzon	Visayas	Mindanao			
Wind threat: Strong winds	Range of	The southern portion of Samar (Basey, Santa Rita, Marabut), the southern portion of Eastern Samar (Maydolong, City of Borongan, Quinapondan, Guiuan, Lawaan, Balangiga, Llorente, Giporlos, Salcedo, Balangkayan, General Macarthur, Hernani, Mercedes), the eastern and southern portions of Leyte (Mahaplag, Abuyog, Javier, Macarthur, Tabontabon, La Paz, Mayorga, Tolosa, Tanauan, Julita, Dulag, Palo, Tacloban City, Babatngon, Matalom, Hilongos, Bato), and Southern Leyte ead time: 36 hours wind speeds: 39 to 61 km/h (Beaufort 6 to 7) impacts of winds: Minimal to minor threat to life a	Dinagat Islands, Surigao del Norte, Surigao del Sur, Agusan del Norte, the northern and eastern portions of Agusan del Sur (Bunawan, San Francisco, City of Bayugan, Esperanza, Talacogon, Rosario, Sibagat, Prosperidad, San Luis, Trento), the northern portion of Davao Oriental (Boston, Cateel), the eastern portion of Misamis Oriental (Gingoog City, Magsaysay, Medina, Talisayan, Balingoan, Kinoguitan), and Camiguin			

HAZARDS AFFECTING LAND AREAS

Heavy Rainfall Outlook

Forecast accumulated rainfall for today

- 100-200 mm: Surigao del Sur
- 50-100 mm: Dinagat Islands, Surigao del Norte, Agusan del Norte, the eastern portion of Agusan del Sur, and the northern portions of Davao Oriental and Davao de Oro

Forecast accumulated rainfall for tomorrow

- 100-200 mm: Surigao del Sur, Surigao del Norte, Dinagat Islands, and Southern Leyte
- 50-100 mm: The southern portions of Eastern Samar and Samar, the eastern and southern portions of Leyte, Bohol, Cebu, Negros Oriental, Siquijor, Camiguin, Misamis Oriental, the northern portion of Bukidnon, Agusan del Sur, and Agusan del Norte.

Forecast rainfall are generally higher in elevated or mountainous areas. Under these conditions, flooding and rain-induced landslides are likely especially in areas that are highly or very highly susceptible to these hazards as identified in hazard maps and in localities that experienced considerable amounts of rainfall for the past several days.

In addition, the Shear Line coinciding with the passage of KABAYAN may bring heavy rainfall over the eastern portion of Southern Luzon today and over the eastern portion of Luzon tomorrow. For more information, refer to Weather Advisory No. 2 issued at 11:00 PM yesterday and the 24-Hour Public Weather Forecast and Outlook issued at 4:00 AM today.

MMSS-04 Rev. 0 / 15-08-2023

TROPICAL CYCLONE BULLETIN NR. 1 Tropical Depression KABAYAN

Issued at 5:00 AM, 17 December 2023 Valid for broadcast until the next bulletin at 8:00 AM today.

HAZARDS AFFECTING LAND AREAS

Severe Winds

The wind signals warn the public of the general wind threat over an area due to the tropical cyclone. Local winds may be slightly stronger/enhanced in coastal and upland/mountainous areas exposed to winds. Winds are less strong in areas sheltered from the prevailing wind direction.

• Minimal to minor impacts from strong winds are possible within any of the areas under Wind Signal No. 1.

Additional provinces in Visayas and Mindanao may be placed under Wind Signal No. 1 in the next bulletin.

The surge of the Northeast Monsoon will bring also **gusty conditions** for the next 2 days over the following areas not under any Wind Signal, especially in coastal and upland/mountainous areas exposed to winds:

• Today and tomorrow: Batanes, Babuyan Islands, Ilocos Norte, Ilocos Sur, Aurora, Bataan, Bulacan, Rizal, Quezon, Lubang Island, Marinduque, Cuyo Islands, Bicol Region, Visayas, the northern and eastern portion of mainland Cagayan, the eastern portions of Isabela and Nueva Ecija, and portions of Cordillera Administrative Region, Zambales, Pampanga, Cavite, Mindoro Provinces.

HAZARDS AFFECTING COASTAL WATERS

Under the influence of the Northeast Monsoon surge and KABAYAN, a Gale Warning is in effect for the coastal waters along the seaboard of Northern Luzon and the eastern seaboards of Visayas and Mindanao. Sea travel is risky for small seacraft (including all motor bancas of any type or tonnage). Mariners of these vessels are advised to remain in port or seek safe harbor. For more information, refer to Gale Warning No. 3 issued at 5:00 AM today.

TRACK AND INTENSITY OUTLOOK

- Hazards such as severe wind and heavy rainfall may be experienced in areas that are not close to the track forecast. Refer to the "Hazards affecting land areas" for more detailed information.
- KABAYAN is forecast to follow a generally west northwestward path across the Philippine archipelago over the next two days and is likely to maintain it strength until its initial landfall over Mindanao. However, the possibility of reaching tropical storm category pre-landfall is not ruled out.
- On the track forecast, it is likely to make landfall along the coast of Surigao del Sur or Davao Oriental tonight or tomorrow early morning, cross the rugged terrain of Mindanao before emerging over either the Bohol Sea or Sulu Sea tomorrow noon or afternoon. Due to frictional effects associated with landfall, KABAYAN is forecast to weaken over land and the possibility of being downgraded into a low pressure area while over land or after emerging over the sea is not ruled out (although in such a case, re-development may occur over the Sulu Sea)
- For the remainder of tomorrow and into early morning of Tuesday, KABAYAN will move across the Sulu Sea south
 of Cuyo Islands. The tropical cyclone is forecast to make another landfall over central or southern Palawan as a
 tropical depression by Tuesday morning, then emerge over the Philippine Sea by noon or early afternoon of the same
 day. Afterwards, KABAYAN may pass near or over Kalayaan Islands in the West Philippine Sea.
- It must be emphasized that due to nature of its strength (as a tropical depression), its track and intensity forecast may still change.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.

The next tropical cyclone bulletin will be issued at 8:00 AM today.
